These per capita municipal recycling rates are for use only with the FY2007-08 DEP Approved Recycling Program (DARP) application for curbside and drop-off programs. Municipalities should refer to this list to determine if they meet the 100 pounds per capita recycling rate specified in elective criterion (letter "A") under the Public Eduction and Participation section. These rates are calculated using data reported by each city or town on the annual Municipal Recycling Data Sheet (MRDS). The rate is calculated by taking the total reported weight of newspaper, cardboard, mixed paper, and bottles / cans and dividing by the total population of the municipality listed on the MRDS.

These per capita municipal recycling rates are for use only with the FY2007-08 DEP Approved Recycling Program (DARP) application for curbside and drop-off programs. Municipalities should refer to this list to determine if they meet the 100 pounds per capita recycling rate specified in elective criterion (letter "A") under the Public Eduction and Participation section. These rates are calculated using data reported by each city or town on the annual Municipal Recycling Data Sheet (MRDS). The rate is calculated by taking the total reported weight of newspaper, cardboard, mixed paper, and bottles / cans and dividing by the total population of the municipality listed on the MRDS.

These per capita municipal recycling rates are for use only with the FY2007-08 DEP Approved Recycling Program (DARP) application for curbside and drop-off programs. Municipalities should refer to this list to determine if they meet the 100 pounds per capita recycling rate specified in elective criterion (letter "A") under the Public Eduction and Participation section. These rates are calculated using data reported by each city or town on the annual Municipal Recycling Data Sheet (MRDS). The rate is calculated by taking the total reported weight of newspaper, cardboard, mixed paper, and bottles / cans and dividing by the total population of the municipality listed on the MRDS.

These per capita municipal recycling rates are for use only with the FY2007-08 DEP Approved Recycling Program (DARP) application for curbside and drop-off programs. Municipalities should refer to this list to determine if they meet the 100 pounds per capita recycling rate specified in elective criterion (letter "A") under the Public Eduction and Participation section. These rates are calculated using data reported by each city or town on the annual Municipal Recycling Data Sheet (MRDS). The rate is calculated by taking the total reported weight of newspaper, cardboard, mixed paper, and bottles / cans and dividing by the total population of the municipality listed on the MRDS.
